## Our Cover

Little Diomed, a tiny island in the Bering Strait, sits just 36 kilometers west of mainland Alaska. Just 3.9 kilometers further to the west — and on the other side of the International Date Line — lies Big Diomed, the easternmost point of Russia. These islands used to be part of a land bridge between Asia and North America, but now they sit apart between two worlds. Read more about Cezar Trifu's, VE3LYC, March 2019 Islands on the Air activation of Little Diomed in this issue. [Steve Gast, KM6RQM, photo]
